## COMPANY HISTORY

AOG Aviation Spares, Inc. was formed in late 2004 as a spare parts supplier serving mainly the private turboprop market.

Development of commuter and corporate product services soon followed. Building strong customer relationships coupled with superior customer service has proven very successful. Seeing additional opportunities to strengthen customer relationships, AOG decided to provide overhaul services for many of the popular items sold. In mid 2006, AOG received FAA 145 certification followed by EASA certification. Developing support for commercial aircraft product lines is now part of our company vision. We strive to provide the highest quality products, in a reasonable amount of time, at great prices.
